# SPAVAĆE SOBE

## BEDROOMS

Svaku prostoriju u stanu možete urediti po vašoj zamisli, ne robujući nikakvim strogo nametnutim pravilima. Ovo naročito važi za spavaću sobu koja treba potpuno da se prilagodi vašim potrebama i shvatanju lepog. Sa druge strane, postoje neke smernice ukoliko želite da sobu uredite u nekom od najčešće korišćenih stilova. U okviru tih smernica, možete slobodno eksperimentisati, ali njih treba imati na umu kao olakšicu u traženju pravog rešenja.

*You can arrange every room in the apartment according to your idea, not be guided by strictly imposed rules. This is especially true for a bedroom that needs to be fully adapted to your needs and understanding of beauty. On the other hand, there are some guidelines if you want to arrange room in one of the most common used styles. Within these guidelines, you can freely experiment, but they should be kept in mind as a relief in finding the right solution.*

### Novi mehanizam

Uveden je novi mehanizam od nemačkog proizvođača Hettich. Ovaj sistem znatno ubrzava montažu vrata jer se veći točkić samo jednim potezom pozicionira na šinu. Osim toga, bez ikakvog šrafljenja, prilikom ispadanja klizača iz šine, korisnik može sam da vrati klizač na postojeću šinu.

### 1 LAKA NIVELACIJA Nivelacija poda ormara na 6 nogara

Ispod poda ormara je ugrađeno 6 nogarića za lako besprekorno nivelisanje poda ormara. To je važno jer se u toku eksploatacije vrata veoma lako i beščujno otvaraju, a uz pomoć ugrađenog SlowMotion mehanizma, veoma lako i usporeno zatvaraju.

### EASY LEVELING Leveling the closet floor on 6 legs

*Bellow the floor of wardrobe there are 6 legs installed for easy leveling. This is important because during usage for doors are opening easy and silent, and with Slow Motion mechanism are very easy and slow closing.*

### 2 NOVI MEHANIZAM Bez problema i buke

Proizvođač mehanizma je unapredio sistem gornjih točkića. Umesto jednog većeg, sada postoje dva koja se rotiraju nezavisno jedan od drugog svaki na svoju površinu naleganja, pa u slučaju i da je šina malo deformisana, oni omogućavaju nesmetano kretanje vrata.

### NEW MECHANISM No problem - No noise

*The mechanism producer has improved the system of upper wheels. Instead of one big wheel there are now two wheels which rotate independetly from each other, so even there are small deformities of the leading line, they make possible the sliding of the doors.*

## Opšte karakteristike Woody kreveta

### General characteristics of Woody beds

### Čvrsta VEZA

#### Metalni sistem spajanja stranica kreveta

Za razliku od sličnih proizvoda na tržištu, kod kojih se spajanje stranica kreveta vrši vijcima za drvo bez tiplova, naši kreveti imaju sigurne, posebno dizajnirane, skrivene metalne spojnice renomiranog italijanskog proizvođača, što uz drvene tiplove omogućava čvrst spoj i dugogodišnju stabilnost.

### Elastična i sigurna PODLOGA

#### Pod kreveta

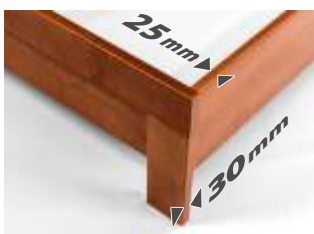

Podloge od šperploče daju ravnu i stabilnu osnovu za dušek čime se obezbeđuje njegovo ravnomerno opterećenje. Time je omogućen zdrav i pravilan položaj kičmenog stuba i celog tela tokom odmora i sna. Razmaci između letvica omogućavaju dobru cirkulaciju vazduha oko duška i njegovo provetravanje.

### Siguran OSOLONAC

#### Savršena podloga za svaki dušek

Na srednju potpornu letvu kreveta, na koju su vezane letvice, montirana su dva nogara za podešavanje visine, tako da se vrlo jednostavno i lako može dobiti savršeno ravna podloga za dušek, bez obzira na eventualne nedostatke poda na kome se krevet nalazi.

### Život sa PRIRODOM

#### Srednji metalni oslonac za potpornu gredu

Kreveti pravljani od punog bukovog drveta, osim što unose toplinu prirodnih materijala u vaš dom, postojani su i dugovečni. Bočne stranice izrađuju se od 25 mm, a čeonu stranu i nogari od 30 mm debljine drvenih ploča što daje posebnu stabilnost i čvrstinu.

### Ispod KREVETA

#### Lako dostupno i uvek čisto

Kako bi spavaća soba bila mesto zdravog odmora, veoma je važna mogućnost lakog čišćenja. Zato posebno ističemo da su svi WOODY kreveti nogarima odignuti od poda, koji je tako dostupan za održavanje.

### Strong CONNECTION

#### Metal system of bed side connecting

Unlike similar products on the market, where the connecting of the bed sides is done with bolts without anchor, our beds have secure, specially designed, hidden metal clips made by renown Italian manufacturer, which, together with wooden wedge enables tight connection and long-term stability.

### Well LINED

#### The bed with the beech laths floor

Lath floor of the bed gives a flat and stabile base for the mattress, thus providing its even loading. This enables a healthy and correct position of the spinal column and the whole body during rest and sleep. The spaces between the laths allow good air circulation around the mattress and its ventilation.

### Strong SUPPORT

#### Perfect background for every mattress

At the middle of support rail on the bed, where laths are attached, we have mounted two legs, in order to allow height adjustment of the bed. This way, very simple and easily you get a perfectly flat surface for a mattress, regardless to the floes of the floor where the bed is located.

### Live with NATURE

#### Natural materials in your home

Beds made of beech wood, are bringing the warmth of natural materials to your home. They are stabile and long lasting. The sides of the bed are made of 25 mm, the side walls and the wooden trestles of 30 mm solid wood plate, which gives a special stability and firmness to the bed.

### Under THE BED

#### Easy available and always clean

In order to have bedroom a healthy place to rest, it is very important that they are easily cleaned. Therefore we have especially emphasized that all "WOODY" beds are lifted on trestles, making the floor absolutely accessible for maintenance.

# DEČIJE SOBE

## CHILDREN ROOMS

Jedan od najvažnijih elemenata u odrastanju svakog deteta predstavlja i životni prostor u kome ono provodi vreme. Bitno je da ovaj prostor odgovara njegovim godinama i potrebama, ali i da oslikava detetovu ličnost na što bolji način i zadovoljava svu njegovu znatiželju, kao i potrebu za specifičnom vrstom funkcionalnosti, koja je svakom mališanu potrebna.

*One of the most important elements in the growth of every child is the living space in which it spends time. It is important that this space corresponds to his age and needs, but also to reflect the child's personality in the best way and satisfies all his curiosity, as well as the need for the specific type of functionality that every child needs.*
